PROJECTS

Forum

Golang, SQLite3, HTML, CSS, Docker

- It was a educational project in Alem School where we had to create web forum from nothing using Golang, Sqlite3 for back-end and HTML, CSS, JavaScript for front-end.
- Forum had next features: communication between users, associating categories to posts, liking and disliking posts and comments, filtering posts. Usage of Docker was requirement too.

Groupie Tracker

Golang, REST API, HTML, CSS

- Groupie Trackers consists on receiving a given API and manipulate the data contained in it, in order to create a site, displaying the information.

Ascii-Art Web

Golang, HTML, CSS

- Ascii-art is a program which consists in receiving a string as an argument and outputting the string in a graphic representation using ASCII. Also, user can choose between 3 types of fonts

EXTRACURRICULAR ACTIVITY
